

Dr. Allan Woolf is the Leader of the Postharvest Science Team at The New Zealand Institute for Plant & Food Research Limited in New Zealand. He has worked in the postharvest area for 25 years, covering a wide range of research including general postharvest storage and technologies, disinfestation, processing, food safety and international development work in a diverse range of crops. In relation to processing, he has worked with industry to develop the novel product - cold pressed avocado oil - as well as olive oil in New Zealand. Other processing areas include high pressure processing for avocado and horticultural crops, individual quick frozen kiwifruit, and fresh-cut apple slices for a patented process.
